# Average Operating Profits of Banks

Insight #1: Wells Fargo, JPMorgan Chase, and Bank of America dominate in terms of operating profit, and their performance is consistently high.

Insight #2: KeyCorp and Huntington Bancshares struggle with low operating profits, remaining consistently at the bottom of the pack.

Insight #3: BAC and STI show the most fluctuations in profits, while PNC shows consistent growth but a slight decline in the last year.

# Descriptive Statistics Summary of Banks' Operating Profit

Insight #1: The range is 140.79B, indicating a very large spread of operating profits among the banks. Some banks have significantly higher operating profits than others.

Insight #2: The median operating profit is 12.75B, meaning half of the banks have profits below this value and half above.

Insight #3: The data is positively skewed, as the higher profits are stretched far from the median.
